

The Truth About Digital Recorders

Every Consultant Needs One...or Two

What They Are

- a) A digital version those mini-cassette recorders journalists used to use.
- b) A portable multi-track recording studio.
- c) Either or both, depending on what you buy.

Answer: c)

What They Do

- Replace/supplement note-taking
- Let you “write” first drafts by talking
- Record podcasts
- Record presentations & speeches
- Record interviews
- Add value to any group you belong to

What Kind?

- Don't get the portable recording studio unless you know what you're doing.
- Replaceable beats rechargeable for batteries.
- For most purposes, any model will do.
- Prioritize your needs before buying.

For iPhone Users

iTalk

APPLICATION DESCRIPTION
A public beta of iTalk Sync for Windows is now available!
<http://italksync.com/download/>
--
WAY more than a "voice recorder"... whether you just want to recall a conversation later, or are serious about capturing the sounds around you, Griffin iTalk is the app you need for your iPhone or 2G iPod touch (2G iPod touch requires Apple Stereo Headset or similar compatible headset).
Your recordings are saved for replay on your iPhone or iPod, and you can use iTalk Sync (a free download available at <http://www.italksync.com/download>) to drag-and-drop them as high-quality AIFF files to your computer over a Wi-Fi connection.
User-centric features include:
- Choose from Good/Better/Best quality levels.
- Pause/resume and append to existing recordings on the fly.
- Append text notes to your recordings for later reference.
- The one-button recording interface is designed for quick, easy operation in the field, and simple management of your recordings.
iTalk System Requirements:
iPhone, iPhone 3G, or 2nd generation iPod touch (2G iPod Touch requires Apple Stereo Headset or similar compatible headset)
Wi-Fi connection for transfer of files to computer (iTalk Sync is available for Mac OS 10.4.11+ and Windows XP and Vista)
WHAT'S NEW IN THIS VERSION:
Added Quick Record Mode to make it easier to create new recordings on application launch.
Changed time slider button size to make it easier to move
